this book examines the relationship between eu energy politics and the law of the world trade organization wto focusing on how the eu s internal energy market can be promoted and protected in a way that is consistent with the requirements of wto law the need for a significant reorientation of the eu foreign policy including its trade and energy policy has become apparent in today s rapidly changing geopolitical context many states are responding to this situation by seeking to increase their strategic sovereignty in the eu this reorientation is taking place under the leitmotifs of strategic autonomy in its foreign affairs and open strategic autonomy in the eu s external trade context given that

the many current geopolitical shifts also affect the international energy landscape it has been argued that the eu needs to increase its autonomy in the field of energy policy as the eu s internal energy market is central to this it needs to be protected from undue foreign influence in this respect three horizontal unilateral tools that are part of the eu s strategy of open strategic autonomy have been considered essential in relevant academic studies the eu investment screening regulation the eu carbon border adjustment mechanism cbam and the eu foreign subsidies regulation this study shows that while it is strategically imperative to protect the internal energy market from undue foreign influence it is difficult to achieve this objective in a wto compatible manner on the basis of the unilateral measures adopted by the eu

perioperative neurosciences translational research examines current clinical research focused on complications and the improvement of patient outcomes in neuroanesthesia and neurocritical care the book addresses important translational topics including neuroanesthetics pharmacogenomics neuroprotection and neurotoxicity in addition it covers special considerations for topics such as stroke traumatic brain injury and pain as well as for specific patient populations like geriatric and pediatric addresses translational developments in pharmacogenomics brain protection and neurotoxicity discusses ethical concerns relevant to clinical research in perioperative neuroscience collates insights from international experts in translating research to practice

this book seeks to enrich and refine global administrative law and eu administrative law analytical tools by examining their manifold relations its aim is to begin to explore the complex reality of the interactions between eu administrative law and global administrative law to provide a preliminary map of such legal and institutional reality and to review it the book is the first attempt to analyze a dense area of new legal issues the first part of the book contains core elements of a general theory of the relationships between global and eu administrative law comparative inquiries exchanges of legal principles and developing linkages the second part is devoted to special regulatory regimes in which global and european law coexist though not always peacefully several sectors are considered cultural heritage medicines climate change antitrust accounting and auditing banking supervision and public procurement

understanding kidney diseases makes accessible a medical specialty that is commonly regarded by students as difficult the target audience is undergraduate and non specialist postgraduate students the book is unique in combining the reference material normally found in a nephrology textbook with the everyday clinical applicability of a medical handbook the chapters are structured on the approach that a clinician should take when assessing someone with a possible kidney problem the factual content is brought to life by over 60 case studies and is illustrated by a high density of figures many displaying information in a graphical form that avoids off putting data and text it is an authored

book written in a consistent style that is deliberately clear concise and easy to follow nonetheless it is referenced in as much detail as would be expected in a conventional textbook it explains principles and concepts that help students understand and interpret clinical problems no other textbook of nephrology combines these features the book emphasises a patient centred approach to practice students knowledge can be put it into practice by answering a bank of questions that patients frequently ask and tested against traditional multiple choice questions in summary understanding kidney diseases gives students confidence in helping someone with a kidney problem praised by leading nephrologists it is the book the authors wish they could have read when they were students

the latest edition of this text is the go to book and most authoritative source on rapid response systems rrs now in its fully revised and expanded third edition textbook of rapid response systems remains the best selling and most comprehensive book on the topic the new edition contains over fifty chapters written by world renowned experts in the field and over fifty percent new material an entire new section of ten chapters was added on pediatric rapid response systems which includes important how to chapters on managing critical situations during pediatric rapid response calls the previous edition had increased attention paid to patient safety and this edition expands that work the utility of rapid response systems for the management of dying patients has been questioned while at the same time there has been an increased knowledge base in the field as a result this edition contains two chapters on management for dying patients for those patients with and those without not for resuscitation orders this helps guide clinicians who are often ill prepared medically and emotionally as they care for this important population of hospitalized patients written by experts in the field this new edition is a valuable resource for medical practitioners nurses respiratory caregivers safety experts and hospital administrators who want to implement and improve a rapid response system
