between 1867 and 2000 the canadian government sent over 150 000 aboriginal children to residential schools across the country government officials and missionaries agreed that in order to civilize and christianize aboriginal children it was necessary to separate them from their parents and their home communities for children life in these schools was lonely and alien discipline was harsh and daily life was highly regimented aboriginal languages and cultures were denigrated and suppressed education and technical training too often gave way to the drudgery of doing the chores necessary to make the schools self sustaining child neglect was institutionalized and the lack of supervision created situations where students were prey to sexual and physical abusers legal action by the schools former students led to the creation of the truth and reconciliation commission of canada in 2008 the product of over six years of research the commission s final report outlines the history and legacy of the schools and charts a pathway towards reconciliation canada s residential schools the legacy describes what canada must do to overcome the schools tragic legacy and move towards reconciliation with the country s first peoples for over 125 years aboriginal children suffered abuse and neglect in residential schools run by the canadian government and by churches they were taken from their families and communities and confined in large frightening institutions where they were cut off from their culture and punished for speaking their own language infectious diseases claimed the lives of many students and those who survived lived in harsh and alienating conditions there was little compassion and little

education in most of Canada's residential schools although Canada has formally apologized for the residential school system and has compensated its survivors the damaging legacy of the schools continues to this day this volume examines the long shadow that the residential schools have cast over the lives of Aboriginal Canadians who are more likely to live in poverty more likely to be in ill health and die sooner more likely to have their children taken from them and more likely to be imprisoned than other Canadians the disappearance of many Indigenous languages and the erosion of cultural traditions and languages also have their roots in residential schools

between 1867 and 2000 the Canadian government sent over 150 000 Aboriginal children to residential schools across the country government officials and missionaries agreed that in order to civilize and Christianize Aboriginal children it was necessary to separate them from their parents and their home communities for children life in these schools was lonely and alien discipline was harsh and daily life was highly regimented Aboriginal languages and cultures were denigrated and suppressed education and technical training too often gave way to the drudgery of doing the chores necessary to make the schools self sustaining child neglect was institutionalized and the lack of supervision created situations where students were prey to sexual and physical abusers legal action by the schools former students led to the creation of the Truth and Reconciliation Commission of Canada in 2008 the product of over six years of research the commission's final report outlines the history and legacy of the schools and charts a pathway towards reconciliation Canada's residential schools the Inuit and Northern experience demonstrates that residential schooling followed a unique trajectory in the north as late as 1950 there were only six residential schools and one hostel north of the sixtieth parallel prior to the 1950s the federal government left Northern residential schools in the hands of the missionary societies that operated largely in the Mackenzie Valley and the Yukon it was only in the 1950s that Inuit children began attending residential schools in large numbers the tremendous distances that Inuit children had to travel to school meant that in some cases they were separated from their parents for years the establishment of day

schools and what were termed small hostels in over a dozen communities in the eastern arctic led many inuit parents to settle in those communities on a year round basis so as not to be separated from their children contributing to a dramatic transformation of the inuit economy and way of life not all the northern institutions are remembered similarly the staff at grandin college in fort smith and the churchill vocational centre in northern manitoba were often cited for the positive roles that they played in developing and encouraging a new generation of aboriginal leadership the legacy of other schools particularly grolier hall in inuvik and turquell hall in igluligaarjuk chesterfield inlet is far darker these schools were marked by prolonged regimes of sexual abuse and harsh discipline that scarred more than one generation of children for life since aboriginal people make up a large proportion of the population in canada's northern territories the impact of the schools has been felt intensely through the region and because the history of these schools is so recent the intergenerational impacts and the legacy of the schools are strongly felt in the north

nathanael vette proposes that the gospel of mark like other narrative works in the second temple period uses the jewish scriptures as a model to compose episodes and tell a new story vette compares mark s use of scripture with roughly contemporary works like pseudo philo the genesis apocryphon 1 maccabees judith and the testament of abraham diverse texts which combined support the existence of shared compositional techniques this volume identifies five scripturalized narratives in the gospel jesus forty day sojourn in the wilderness and call of the disciples the feeding of the multitudes the execution of john the baptist and the crucifixion of jesus this fresh understanding of how the jewish scriptures were used to compose new narratives across diverse genres in the second temple period holds important lessons for how scholars read the gospel of mark instead of treating scriptural allusions and echoes as keys which unlock the hidden meaning of the gospel vette argues that mark often uses the jewish scriptures simply for their ability to tell a story
