this volume presents new philosophical essays on a topic that has been neglected in most recent philosophy games sports and play some contributions address conceptual questions about what games and sports have in common and that distinguishes them from other activities here many take their start from bernard suits's celebrated analysis of game playing in his book the grasshopper and either elaborate it or propose an alternative to it other essays discuss normative issues that arise within games and sports such as about fairness for example in the treatment of male and female athletes yet others consider broader evaluative questions about the value of games and sports which some see as enabling the display of distinctive excellences games sports and play includes a posthumous essay by suits defending his claim in the grasshopper that life in utopia would consist primarily in playing games the volume's chapters approach the topic of games sports and play from different angles but always in the belief that there is rich terrain here for philosophical investigation

in the mid twentieth century the philosopher ludwig wittgenstein famously asserted that games are indefinable there are no common threads that link them all nonsense says the sensible bernard suits playing a game is a voluntary attempt to overcome unnecessary obstacles the short book suits wrote demonstrating precisely that is as playful as it is insightful as stimulating as it is delightful suits not only argues that games can be meaningfully defined he also suggests that playing games is a central part of the ideal of human existence so games belong at the heart of any vision of utopia originally published in 1978 the grasshopper is now re issued with a new introduction by thomas hurka and with additional material much of it previously unpublished by the author in which he expands on the ideas put forward in the grasshopper and answers some questions that have been raised by critics
