extension and advisory services eas play a key role in facilitating innovation processes empowering marginalized groups through capacity development and linking farmers with markets advisory services are increasingly provided by a range of actors and funded from diverse sources with the broadened scope of eas and the growing complexity of the system the quantitative performance indicators used in the past e g related to investment staffing or productivity are not adequate anymore to understand whether the system is well functioning to enable evidence based and informed policy and investment decision for extension and advisory systems the eas yardstick eas y has been developed through a consultative expert process it constitutes a holistic scoring tool based on a comprehensive set of metrics that can capture all the nuances of the pluralistic eas metrics are organized into two modules related to eas performance and to eas outcomes each subdivided into key eas topics these cover elements of the eas enabling environment scope and provision of services and coordination collaboration and learning in the system at the outcome level topics include the acquisition of skills changes in behaviours and livelihood transformations all metrics are operationalized through a scoring mechanism eas y is digitally enabled through the kobo toolbox and is used for participatory assessments in various contexts assessments can support a systematic crosscountry analysis complementing findings from more specific impact evaluations of eas interventions or in depth process evaluations as such it contributes to substantially enhance eas system performance and outcomes by guiding investment and policy decisions

proposed in the early 1990s the enhanced assumed strain eas method is one of the probably most successful mixed finite element methods for solid mechanics this cumulative dissertation gives a comprehensive overview of previous publications on that method and covers recent improvements for eas elements in particular we describe three key issues of standard eas elements and develop corresponding solutions

an effective system to alert the public during emergencies can help reduce property damage and save lives in 2004 the federal emergency management agency fema initiated the integrated public alert and warning system ipaws with the goal of integrating the nation s emergency alert system eas and other public alerting systems into a comprehensive system in 2009 the government accountability office gao reported on long standing weaknesses with eas and fema s limited progress in implementing ipaws subsequently fema and the fcc conducted the first ever nation wide eas test in november 2011 this book examines recent efforts to implement ipaws and improve eas how ipaws capabilities have changed since 2009 and what barriers if any affect its

implementation and the results of the nation wide eas test and federal efforts to address identified weaknesses are discussed

this mixed methods research explored the impact of an early alert system eas implemented in flexible asynchronous online program offerings at a two year technical college there is limited research of an eas within fully flexible asynchronous online programs within two year institutions with the skilled workforce shortages higher education institutions are using online courses as a method to increase enrollments with the hope of combating achievement and equity gaps this study measured successful course completion for 608 students in online courses the eas starfish recorded 1 871 flags and 1 428 kudos for the fall 2018 semester the student perspective was obtained and compared with the quantitative data triangulation of the different data sources and notifications of the eas were used to determine that students not successfully passing classes received a mean difference of 5.3 more flags than kudos the constructivist learning theory is used as the theoretical framework underpinning this study recommendations include factors related to the student instructor and institution the first recommendation is that students would benefit from an assessment of academic and technological readiness to ensure cognitive ability the second recommendation supports that instructors would benefit from formalized training related to teaching online additionally instructors should be granted more access to holistically view the eas activity of a student in all classes the final recommendation is that course infrastructure and pedagogical framework adopt online course quality measures to ensure a student centered approach
