in the past days the noble profession of public and community health was often looked upon with derision as the health workers themselves failed to project a professional image and instead appeared as though they were casually engaging in domestic activities this had the unfortunate consequence of leaving those in the community families and patients who interacted with them feeling downcast and gloomy as an advocate for the field for over twenty five years i have had the opportunity to address this issue at numerous forums however i am pleased to note that in recent times the community and public health workers have taken a more proactive approach to health promotion they now present themselves as sharp professional and positive role models not unlike esteemed educators and scholars no longer do they appear more dispirited than their clients but rather exude a demeanor that inspires and uplifts those around them
