genocide involves significant death and trauma yet the enormous scope of genocide comes into view when one looks at the factors that lead to mass killing the struggle for survival during genocide and the ways survivors reconstruct their lives after the violence ends over a one hundred day period in 1994 the country of rwanda saw the genocidal slaughter of at least 800 000 tutsi at the hands of members of the hutu majority government this book is a powerful oral history of the tragedy and its aftermath from the perspective of its survivors based on in depth interviews conducted over the course of fifteen years the authors take a holistic approach by tracing how

victims experienced the horrific events as well as how they have coped with the aftermath as they struggled to resume their lives the rwanda genocide deserves study and documentation not only because of the failure of the western world to intervene but also because it raises profound questions about the ways survivors create a new life out of the ashes of all that was destroyed how do they deal with the all encompassing traumas of genocide is forgiveness possible and what does the process of rebuilding teach us about genocide trauma and human life
