china's growing economic involvement in sub saharan africa and latin america has been a source of major controversy the official chinese position maintains that the growth of bilateral relations is of mutual benefit and provides a good example of south south cooperation critics on the other hand see the economic relations between china and other developing countries as highly unequal with most of the benefits accruing to china and a few local elites they also point to negative socio economic political and environmental consequences how china is reshaping the global economy development impacts in africa and latin america throws more light on these controversies through a comparative study of china's impact on the two regions it looks not just at bilateral relations between china and the two regions but also analyses the changes in the global economy brought about as a result of the shift in economic activity from north america and western europe to asia this book looks at the factors which led to rapid economic growth in china and the way in which this has affected global manufacturing commodity markets the

international presence of chinese companies and financial flows it examines the different forms of chinese economic involvement in sub saharan africa and latin america the main drivers and economic social political and environmental consequences it ends with a comparison of the two regions that highlights the importance of different histories and political and institutional contexts in determining the impacts of china since the first edition of how china is reshaping the global economy development impacts in africa and latin america china's role in the global economy has continued to expand and the chinese government's foreign policy has become more assertive the global presence of china has been marked by the expansion of the belt and road initiative to almost 150 countries and the trade war between the us and china as well as increased western concerns over the activities of major chinese companies such as huawei this new edition documents these changes and their implications for ssa and lac

the book comprises thirty selected articles from beijing review magazine that discuss critical issues on china's development over the past decade these include its governance and democratic model the challenges the ruling communist party of china faces and the achievements it has made and the country's role in promoting global peace and cooperation in the post pandemic world the articles provide information on chinese politics under the leadership of president xi jinping the uniqueness of this book is that most of these selected articles were written by international experts based on their observations and research its purpose is to be a reference for researchers and anyone interested in learning about china

in a time where the usa seems frantic to maintain their world domination by funding a crusade for democracy it is easy to paint china as an enemy that needs to be kept in check but is world domination the right goal what about world peace and harmony for all people the greatest challenges facing humanity now are global in nature crossing countries and cultures the world doesn't need another religious or ideological battle such as democracy vs communism it needs all the citizens of our world but in particular our world leaders and advisors to truly lead in building empathy and mutual trust promoting cooperation over competition for the benefit of all humanity as such a greater understanding of china is no longer optional in our global village it is necessary if we want to tackle global challenges such as the covid 19 pandemic or face critical world issues such as climate change world peace and collaborative governance as china returns to its original path and reinstates itself as one of the key world leaders it demands to be treated with respect and as an equal china is not our enemy their confucian roots are strongly grounded in building harmonious human relationships and we in the west must build our empathy and knowledge so we can see more shades of grey in this complicated world we all share this planet and its future destiny together and confrontational western thinking will only lead to war this macroscopic view of chinese civilization and cultural development will help western educated readers better interpret world events through a broader and deeper understanding of chinese ways of thinking and behaving china's historical trajectory and trends current developments and the context behind and around them the authors suggest that we need to view the chinese way as complementary instead of focusing on the differences we should spend our energy and resources improving our world instead of minimizing others to maintain superiority each of us can change

the world for the better let s replace us versus them thinking with more we and more trust as mutual understanding and tolerance will enable all of us as humans on earth to live in greater harmony with each other and with ourselves
