the revolutionary battleship dreadnought of 1906 brought together in one package the new technology of oil fired boilers and steam turbines and all big gun armament in doing so she rendered all other capital ships then afloat completely obsolete ten years later the v w class did to destroyers what the dreadnoughts had done to

battleships they set a completely new and higher standard of technology and were a cut above anything that had come before they were however less revolutionary than evolutionary and in this new book john henshaw takes the reader through all the developmental stages with a detailed history of the step by step lessons that were learnt not all of which were fortuitous in one package the royal navy finally acquired a hull that possessed not just good sea keeping capability but one that was able to carry heavier armament without any adverse effects range and speed were commensurate with their size while the super firing guns fore and aft could be deployed in all weathers for a four gun broadside the v w design set the trend for all destroyer design for the next two decades and indeed the basic layout of destroyers stayed the same long beyond that the formula of a raised foredeck and superfiring guns fore and aft continued in the royal navy until the battle class of 1944 and in the united states navy until the fletcher class of 1943 that the v ws served on through world war ii in various forms is a testament to the soundness of the basic concept their adaptability and strength the v stood for venerable because they certainly proved that and w for watershed because they were truly a turning point in destroyer design the narrative is superbly illustrated with forty five detailed profile and deck plans for which the author is so well known of the principal early british destroyer types and illustrates all the v ws through to the end of world war ii including some conversions that were considered but never completed the book also looks at the influence of the basic design on the destroyers of other navies this new book which will appeal both to naval historians and modelmakers brings together under one cover a narrative that is comprehensive in its scope well researched and elegantly supported with detailed line drawings and selected photographs for the period 1890 1945

the aim of this book is to offer to the next generation of young researchers a broad and largely self contained introduction to the physics of heavy ion collisions and the quark gluon plasma providing material beyond that normally found in the available textbooks for each of the main aspects qcd thermodynamics and global features of the qgp collision hydrodynamics electromagnetic probes jet and quarkonium production color glass condensate and the gravity connection the present volume provides extensive and pedagogical lectures surveying the present status of both theory and experiment a particular feature of this volume is that all lectures have been written with the active assistance of selected students present at the course in order to ensure the adequate level and coverage for the intended readership

vols for 1903 include proceedings of the american physical society

contains the 4th session of the 28th parliament through the 1st session of the 48th parliament
