before i begin to explain to you in a general way what this system is about and to talk about our methods i want particularly to impress on your minds that the most important ideas and principles of the system do not belong to me this is chiefly what makes them valuable because if they belonged to me they would be like all other theories invented by ordinary minds they would give only a subjective view of things when i began to write a new model of the universe in 1907 i formulated to myself as many other people have done before and since that behind the surface of the life which we know lies something much bigger and more important and i said to myself then that until we know more about what lies behind all our knowledge of life and of ourselves is really negligible i remember one conversation at that time when i said if it were possible to accept as proven that consciousness or as i should call it now intelligence can manifest itself apart from the physical body many other things could be proved only it cannot be taken as proved i realized that manifestations of supernormal psychology such as thought transference clairvoyance the possibility of knowing the future of looking back into the past and so on have not been proved so i tried to find a method of studying these things and worked on that line for several years i found some interesting things in that way but the results were very elusive and though several experiments were successful it was almost impossible to repeat them i came to two conclusions in the course of these experiments first that we do not know enough about ordinary psychology we cannot study supernormal psychology because we do not know normal psychology secondly i came to the conclusion that certain real knowledge exists that there may be schools which know exactly what we want to know but that for some reason they are hidden and this knowledge is hidden so i began to look for these schools i travelled in europe egypt india ceylon turkey and the near east but it was really later when i had already finished these travels that i met in russia during the war a group of people who were studying a certain system which came originally from eastern schools this system began with the study of psychology exactly as i had realized it must begin the chief idea of this system was that we do not use even a small part of our powers and our forces we have in us so to speak a very big and very fine organization only we do not know how to use it in this group they employed certain oriental metaphors and they told me that we have in us a large house full of beautiful furniture with a library and many other rooms but we live in the basement and the kitchen and cannot get out of them if people tell us about what this house has upstairs we do not believe them or we laugh at them or we call it superstition or fairy tales or fables this system can be divided into study of the world on certain new principles and study of man the study of the world and study of man include in themselves a kind of special language we try to use ordinary words the same words as we use in ordinary conversation but we attach a slightly different and more precise meaning to them

study of the world study of the universe is based on the study of some fundamental laws which are not generally known or recognized in science the two chief laws are the law of three and the law of seven which will be explained later included in this and necessary from this point of view is the principle of scale a principle which does not enter into ordinary scientific study or enters very little the study of man is closely connected with the idea of the evolution of man but the evolution of man must be understood in a slightly different way from the ordinary ordinarily the word evolution applied either to man or to anything else presupposes a kind of mechanical evolution i mean that certain things by certain known or unknown laws transform into other things and these other things transform into still others and so on but from the point of view of this system there is no such evolution at all i do not speak in general but specifically of man the evolution of man if it occurs can only be the result of knowledge and effort as long as man knows only what he can know in the ordinary way there is no evolution for him and there never was any evolution for him serious study begins in this system with the study of psychology that is to say with the study of oneself because psychology cannot be studied as astronomy can outside oneself a man has to study himself when i was told that i saw at once that we do not have any methods of studying ourselves and already have many wrong ideas about ourselves so i realized that we must get rid of wrong ideas about ourselves and at the same time find methods for studying ourselves perhaps you realize how difficult it is to define what is meant by psychology there are so many meanings attached to the same words in different systems that it is difficult to have a general definition so we begin by defining psychology as study of oneself you have to learn certain methods and principles and according to these principles and using these methods you will try to see yourselves from a new point of view
