although the united states has prioritized its fight against militant groups for two decades the transnational jihadist movement has proved surprisingly resilient and adaptable many analysts and practitioners have underestimated these militant organizations viewing them as unsophisticated or unchanging despite the ongoing evolution of their tactics and strategies in enemies near and far two

internationally recognized experts use newly available documents from al Qaeda and ISIS to explain how jihadist groups think, grow and adapt. David G. Gartenstein-Ross and Thomas Joscelyn recast militant groups as learning organizations, detailing their embrace of strategic, tactical and technological innovation. Drawing on theories of organizational learning, they provide a sweeping account of these groups' experimentation over time. Gartenstein-Ross and Joscelyn shed light on militant groups' most effective strategic and tactical moves, including attacks targeting aircraft and the use of the Internet to inspire and direct lone attackers. They examine jihadists' ability to shift their strategy based on political context while militant groups' initial efforts to upgrade their capabilities often fail. These attempts should generally be understood not as failures but as experiments in service of a learning process, a process that continues until these groups achieve a breakthrough, providing unprecedented historical and strategic perspective on how jihadist groups learn and evolve. Enemies near and far also explore how to anticipate future threats, analyzing how militants are likely to deploy a range of emerging technologies.

Most murderers and rapists escape justice, a horrifying fact that has gone largely unexamined until now. This groundbreaking book tours nearly the entire criminal justice system, examining the rules and practices that regularly produce failures of justice in serious criminal cases. Each chapter outlines the nature and extent of justice failures in present practice, describing the interests at stake and providing real-world examples. Finally, each chapter reviews proposed and implemented reforms that could balance the competing interests in a less justice-frustrating manner and recommends one, sometimes completely original, reform to improve the system. A systematic study of justice failures is long overdue, as this book discusses regular failures of justice in serious criminal cases that undermine deterrence and the criminal justice system's credibility with the community. As a moral authority, the damage caused by unpunished crime is immense and even worse falls primarily on vulnerable minority communities. Now, for the first time, students, researchers, policymakers and citizens have a resource that explains why justice failures occur and what can be done about them. Confronting failures of justice is accessible for use by college freshmen through graduate students and law students and is designed to be main text for a course on justice failures but it could be used in conjunction with other texts in a broad range of courses touching on criminal justice. It presents arguments in a highly organized fashion and provides dozens of case studies, many with photographs, to gain student interest and to bring the academic discussions to life.
