this book is a comprehensive guide to the space time algebra of sixteen component values sedeons this algebra is designed to provide a compact representation of equations that describe various physical systems the book considers the symmetry of physical quantities concerning the operations of spatial and temporal inversion this approach allows the formulation of a wide class of mathematical physics equations within a unified framework and enables the generalization of these equations for essential problems in electrodynamics hydrodynamics plasma physics field theory and quantum mechanics in particular it is shown that the broken symmetry between electricity and magnetism in electrodynamics equations is a result of choosing an asymmetric representation of these phenomena the sedeonic algebra

enables the formulation of maxwell like equations for the fields with a nonzero mass of quantum which facilitates the calculation of energy for baryon baryon interaction and the semi classical interpretation of this interaction it also allows one to generalize the hydrodynamics equations for the case of vortex turbulent flows and for a hydrodynamic two fluid model of electron ion plasma

this book presents the applications of fractional calculus fractional operators of non integer orders and fractional differential equations in describing economic dynamics with long memory generalizations of basic economic concepts notions and methods for the economic processes with memory are suggested new micro and macroeconomic models with continuous time are proposed to describe the fractional economic dynamics with long memory as well

this book represents a significant and timely contribution to the copious literature of the eu as a global actor providing new insights and fresh perspectives into the promotion of human rights and international labour standards in the eu s external trade relations building on and stimulating further the already well engaged scientific dialogue on this area of research in particular it provides the basis for developing a new analytical structure for better understanding the role of the eu in promoting human rights and international labour standards in global trade and in particular for assessing the extent to which and how normative considerations have influenced the adoption of eu legal instruments and policy decisions this book will appeal to research scholars post graduate students practitioners and human rights activists

while global challenges continue to reshape the here and now public and corporate finance management needs to adapt quickly to increase the efficiency of institutions enterprises and policies to face our new reality there are very few publications that offer a comprehensive approach to the financing of environmental protection activities by the european union this book explores this topic from various angles and levels as well as highlighting the determinants that influence micro and macro level decisions in this area it presents an in depth and unique analysis of the sources of funding for environmental measures implemented by european union institutions against the backdrop of national expenditure by member states and analyses the plausibility of the adopted targets in the run up to 2050 in the context of the war in ukraine and ad hoc energy policy solutions this book is a voice in an ongoing discussion among the community of practitioners and theoreticians on sources of financing for the energy transition to achieve independence from russian sources in the quickest possible timeframe it demonstrates that environmental measures cannot occur without the financial participation of economic actors and financial institutions particularly the capital market and further underscores the scale of involvement in environmental projects as measured by the value of green loans and green bonds covered by european financial institutions the authors offer policy recommendations for financing activities related to environmental policy notably energy transition this book will appeal to scholars students and researchers of corporate finance banking strategic and public finance management as well as policy makers and practitioners involved in green finance investments
