the national oceanic and atmospheric administration noaa center for operational oceanographic products and services co ops maintains a network of oceanographic and meteorological stations along the united states coastlines and great lakes to monitor water levels winds speed direction and gusts barometric pressure and air water

temperature co ops also operates stations in partnership with the national estuarine research reserve nerr and the puerto rico seismic network prsn this report documents the elevated water levels high winds and reduced barometric pressures recorded at stations along the coast of puerto rico and the u s virgin islands as well as the east coast of the u s from florida to maine during hurricane irene station information and locations are contained in figures 1 2a 2d and appendices 1 2 tidal stations are referenced to the standard chart datum of mean lower low water mllw based on the national tidal datum epoch 1983 2001 appendix 3 in addition at many locations along the east coast of the u s water levels are provided relative to a geodetic reference datum the north american vertical datum of 1988 navd88 to assist in relating water levels to coastal inundation estimates table 1 provides storm tide elevations and predicted tide elevations for stations affected by hurricane irene by geographic region where available water level elevations relative to navd88 are also presented along with the residuals at the time of the maximum storm tides maximum storm surge levels are summarized in table 3 ranked by amplitude storm tides are the maximum water level elevations during a storm passage residuals are the elevation differences between observed and predicted tides storm surge is the residual caused directly by the storm during its passage table 2 provides maximum wind speeds wind gusts and minimum barometric pressures observed at the stations during hurricane irene in addition the report highlights stations which have exceeded historical recorded maximum water levels as a result of irene figure 3 the historical recorded maximum water levels are the maximum water elevation measured by a water level station with a continuous time series throughout a high tide cycle for the entire historical period a complete cycle is required to calculate the maximum tide elevation applying a best fit curve to the observations these historical records may not have included the highest water levels measured at a station during an event if a complete high tide cycle was not measured due to station sensor damage appendix 3 individual time series graphs are provided for each station figures 4 88 for comparison and context the historical recorded maximum water levels are displayed on the graphs where available the highest astronomical tide hat datum is also displayed to illustrate the elevation of the highest predicted astronomical tide expected to occur at a specific tide station over the 1983 2001 national tidal datum epoch overview

through this thesis i wanted to capture the emotion and consequence caused by natural disasters from the moment its magnitude is understood through the lasting effects of its aftermath specifically i attempted to address the following questions in the face of a natural disaster what themes are universal and how do people s experiences differ does the aftermath of a disaster strengthen one s resolve or does it diminish it to answer these questions i conducted over twenty interviews which became a collection of oral

histories focusing on a local and relatively recent event hurricane irene by the time the hurricane reached vermont it was technically a tropical storm but with the help of a highly precipitous year it was enough to cause flash floods and overflowing rivers the steady rain ran straight down the mountainous terrain and into the valleys these first hand accounts come from people who as a result lost their homes and their businesses as well as first responders other emergency management professionals and community volunteers i spoke with men and women those from various socioeconomic backgrounds and with different ages and experiences each person s story was incredibly touching but there are also undeniable differences some people had to painstakingly throw priceless possessions in the dumpster decipher unfair insurance policies and rebuild their homes from scratch others while vital to the recovery process after irene went home each night to a life that was really no different than it had been on august 27 however there were commonalities as well regardless of how severely impacted they were each and every person i interviewed made sure to highlight the remarkable empathy generosity and resilience they saw in their family neighbors fellow vermonters and even themselves

on august 28 2011 at 11 00 am tropical storm irene made landfall just west of westport connecticut the emergency management team had been tracking hurricane irene the week prior and extensive planning had been put in place all indications were this hurricane could be the most devastating seen in connecticut in decades an extensive public information campaign lead up to the day of the storm utilizing press releases coded announcements news conferences and internet outlets a local declaration of emergency was declared and a voluntary evacuation of low lying areas was stated firefighters and emt s went door to door in the comp beach hillspoint and compo mill areas of town while westport police patrolled saugatuck shores announcing the evacuation it was made clear to all residents who decided to stay that once the hurricane hit emergency responders may not be able to respond long lots shelter was opened saturday afternoon through a cooperative effort of many agencies including human services cert red cross boe health district and the fire marshal s office chartwell food service provided meals to the shelter which saw 72 occupants at the height of operations this was somewhat of an uncharted area as westport had not opened a shelter with this number of residents even for hurricane gloria in 1985 as the storm hit on the morning of the 28th the expected call volume picked up staffing in all departments had been supplemented with 3 shifts of firefighters on duty that sunday morning the bulk of the calls for service were the expected wires down flooding trees into buildings and several minor electrical fires in all the westport fire department responded to almost 400 incidents before the storm and its aftermath subsided fortunately the predicted hurricane category i winds had subsided to 50 mph tropical storm strength but flooding

was as predicted striking just as spring high tide hit flooding was extensive in the saugatuck shore compo hillspoint and main street areas a decision was made to cut power to the downtown area around 11 00 am on sunday this decision did not come easily but was necessary to prevent the potential of an electrical fire downtown flooding downtown was extensive and several stores still remain closed at the writing of this report power outages and road closures were widespread with approximately 70 of westport dark as the focus switched from response to recovery westport was fortunate to sustain 15 17 line crews and 10 tree crew daily throughout the recovery although power restoration was slow for many westport fared much better than most of its surrounding communities the eoc remained in operation until the last customers were restored 8 days later luckily we saw no loss of life or serious injuries due to the storm aggressive damage assessments data gathering allowed fema to visit westport very early on preliminary damage assessments pda were conducted with fema representatives almost jumping over chain saws as the cleanup continued connecticut was declared a presidential disaster 4023 dr ct on september 2 2011 and westport emergency management has been assisting residents and businesses recover losses they incurred since the storm preparation and a strong cooperative spirit of all westport department heads were critical in having a successful response to tropical storm irene lessons learned and actions implemented from the severe storm and flooding event of march 2010 and response to bridgeport s tornado also in 2010 led to a smoother and safer operation during irene

please note that the content of this book primarily consists of articles available from wikipedia or other free sources online pages 25 chapters 1938 new england hurricane effects of hurricane floyd in new england hurricane cindy 1959 hurricane irene excerpt hurricane irene was a large and destructive tropical cyclone which affected much of the caribbean and east coast of the united states during late august 2011 irene is currently ranked as the seventh costliest hurricane in united states history the ninth named storm first hurricane and first major hurricane of the 2011 atlantic hurricane season irene originated from a well defined atlantic tropical wave that began showing signs of organization east of the lesser antilles due to development of atmospheric convection and a closed center of circulation the system was designated as tropical storm irene on august 20 2011 after intensifying irene made landfall in st croix as a strong tropical storm later that day early on august 21 the storm made a second landfall in puerto rico while crossing the island irene strengthened into a category 1 hurricane the storm paralleled offshore of hispaniola continued to slowly intensify in the process shortly before making four landfalls in the bahamas irene peaked as a 120 mph 195 km h category 3 hurricane thereafter the storm slowly leveled off in intensity as it struck the bahamas and then

curved northward after passing east of Grand Bahama continuing to weaken. Irene was downgraded to a category 1 hurricane before making landfall on the outer banks of North Carolina on August 27, becoming the first hurricane to make landfall in the United States since Hurricane Ike in 2008. Early on the following day, the storm re-emerged into the Atlantic from southeastern Virginia. Although Irene remained a hurricane over land, it weakened to a tropical storm while making yet another landfall in the Little Egg Inlet in southeastern New Jersey on August 28.

The purpose of this hearing is to investigate lack of planning and communication by FEMA and National Grid in the wake of Tropical Storm Irene.

describes the worst hurricanes in history as well as formation scale and disaster tips provided by publisher

This is likewise one of the factors by obtaining the soft documents of this **Hurricane Irene** by online. You might not require more era to spend to go to the ebook initiation as competently as search for them. In some cases, you likewise pull off not discover the revelation Hurricane Irene that you are looking for. It will definitely squander the time. However below, past you visit this web page, it will be correspondingly very easy to acquire as capably as download lead Hurricane Irene. It will not take on many era as we run by before. You can attain it though do something something else at home

and even in your workplace. as a result easy! So, are you question? Just exercise just what we manage to pay for below as capably as review **Hurricane Irene** what you as soon as to read!

1. What is a Hurricane Irene PDF? A PDF (Portable Document Format) is a file format developed by Adobe that preserves the layout and formatting of a document, regardless of the software, hardware, or operating system used to view or print it.
2. How do I create a Hurricane Irene PDF? There are several ways to create a PDF:
3. Use software like Adobe Acrobat, Microsoft Word, or Google Docs, which often have built-in PDF creation tools. Print to PDF: Many

applications and operating systems have a "Print to PDF" option that allows you to save a document as a PDF file instead of printing it on paper. Online converters: There are various online tools that can convert different file types to PDF.

4. How do I edit a Hurricane Irene PDF? Editing a PDF can be done with software like Adobe Acrobat, which allows direct editing of text, images, and other elements within the PDF. Some free tools, like PDFescape or Smallpdf, also offer basic editing capabilities.
5. How do I convert a Hurricane Irene PDF to another file format? There are multiple ways to convert a PDF to another format:
6. Use online converters like Smallpdf, Zamzar, or Adobe

- Acrobats export feature to convert PDFs to formats like Word, Excel, JPEG, etc. Software like Adobe Acrobat, Microsoft Word, or other PDF editors may have options to export or save PDFs in different formats.
