ante la pregunta de si escribir libros se ha convertido en un anacronismo en la era de la comunicación digital y la cibercultura la respuesta es ciertamente un no sin embargo aunque por una parte pueda observarse que el libro como objeto y concepto se mantiene vivo en la era digital por otra debe analizarse y estudiarse lo que esta presencia implica en términos de los nuevos modelos de escritura lectura y pensamiento para Roger Chartier la revolución del texto electrónico no ha relegado al libro de modo que pueda ser catalogado como una antigüedad por el contrario ha sido una excelente manera de reinventar el análisis de la cultura impresa haciendo énfasis en las diferentes herramientas con que cuenta la industria editorial en el ámbito literario el uso de estas tecnologías ha permitido el surgimiento de formas híbridas de creación que permiten la integración de elementos extra textuales y proponen un soporte diferente a la cultura escrita así como un soporte nuevo para el libro es a causa de una conjunción de este tipo que surge la llamada literatura electrónica aquella que es creada en un entorno digital y sólo puede ser consumida en un soporte electrónico en esta investigación se analizan aspectos relacionados con los cambios que padece el producto literario así como el repertorio del mismo la figura del lector o consumidor y el concepto del productor o autor
